

INTERPRINT

Who we are ...

Interprint is an international decor printing company. We are one of the worldwide market leaders in our sector. 'Think global, act local' – that has been the Interprint philosophy for 50 years.

Focusing on design and technology, we see ourselves as the creative driver of trends and a solution-oriented partner of our customers.

Internationality and a passion for the design of surfaces characterise our corporate culture.

What we do ...

Wood, stone and creative decors from Interprint decorate the surfaces of furniture and flooring and derived timber products used for interior design. In these areas, we offer our customers a large range of materials for their processing. These include decorative papers, finish foils, melamine films, water-resistant films and other product innovations – produced with gravure printing or on the worldwide first industrial digital printer for decor printing.

Interior Design Trends ...

Interprint proved its reliable feel for interior design trends and zeitgeist with its decor selection presented at the [HUB Interior Festival](#) in November 2018. The designs selected for the event were greatly appealing to the HUB visitors. The trend statements of the large flagship trade fairs for interior design, *imm cologne* and *Heimtextil* in January 2019, confirmed that Interprint is on the right track with its decor recommendations. – More: [here](#)
