## MEBLE POLSKA 2022 Furniture Trade Show coming in May

Not in February as originally planned but on 16-19 May 2022, the next edition of MEBLE POLSKA trade fair - the largest furniture buying platform in Poland - will be held in Poznań. The change of date was due to the uncertain epidemic situation. Rescheduling the trade fair will ensure that participants benefit as much as possible from taking part in it.

### In the world's top

The MEBLE POLSKA 2022 - Furniture Fair is one of the most effective tools for promoting exports of Polish furniture which is listed in the elite group of the most important furniture industry trade fairs in the world. The last edition of this event, held in February 2020 just before the outbreak of the pandemic, was attended by over 22,000 people from 69 countries. 38 percent of the visitors were furniture buyers from abroad. In addition to a large group of traders representing the Polish retail network, the Poznan fair is visited by representatives of most large European buying groups and furniture chain stores, as well as many furniture wholesale distributors and online traders from other continents.

### The largest exhibition of Polish furniture

The MEBLE POLSKA 2022 Furniture Trade Fair is the world's largest exhibition of the Polish furniture industry's offer. As usual, they are accompanied by the HOME DECOR Interior Trade Fair.

The exhibition in 2022 looks exceptionally interesting. Most leading Polish furniture manufacturers, who are interested in increasing their export, have announced their presence in Poznań. In addition to affordable furniture made of furniture board, the fair will also feature products made of solid wood and other high-end furniture. The exhibition of upholstered furniture and mattresses, in the production of which Poland is a world leader, also seems to be interesting. Following the example of other furniture fairs around the world, a part of the exhibition offered exclusively to key buyers with the largest purchase budgets will be presented within closed spaces (so-called secret rooms).
